- Children Project Münsterschule Doberman (Germany)
Project Lady Dieskau University Rostock
Children Project of Colonia

I dispose, next to my trainings, previous professional activities and my large social commitment during many years, about a lot of knowledge and experiences, at least life experience, quite apart from interpersonal skill and moderation abilities for team-oriented work. But understanding, caution and sensitivity won't always avoid edges and corners by me. Finally, the role of "consultant", "mediator", "development worker", "moderator" and "promoter" will not be accomplished without an own profile. Since 2000, I import my knowledge and my engagement (volunteers) into Zwirbel International Children Projects, and since the animal slaughters (disease) I feel personally challenged to show the respect to animals, especially to children. The Pop- Art- Event domain shows many possibilities to this.

Be convinced yourself of my creativity and innovation force!
