

Preamble Zwirbel®

This fable history has grown and grown, while I told it to my family. It's the history of the little cow Zwirbel, who travels from Leuk in Wallis to the wide world, along the protected forests and natural parks. The nature is strongly protected and you can observe many animals and plants. They are rare places for butterflies and birds too, from which Zwirbel will meet someone. We wish a joyous and amusing adventure trip, to all grand and little children.

(The cow legend- not only for children!)

The little cow Zwirbel loves the beauty and the flowers and the grasses of the mountains. From her Swiss origin, she travels around the world. On her trip she meets strange natures and persons: a fish who changes into a bear and who travels by the sea to Japan. She learns that we don't have to judge things superficially and that we are responsible for all the things that we love.
